

Danyaal Rangwala

Experience:

Senior Software Engineer

SalesforceIQ (RelateIQ)
Summer '14 - Present

As a software engineer on the CRM team, I worked on various projects on the front-end and back-end of our team. One notable endeavor was an architectural project called Popgun - an open source Javascript popover library that led to a significant increase in memory performance within our app.

HTML/CSS, AngularJS, Java

Mobile App Developer

NTVB Media
Fall '14 - Winter '15

As a mobile app developer, I worked with a group of four other people to design and develop an iOS app that works as a smart television remote. Not only does it function as a normal remote to flip through channels and record shows, but it also recommends shows to watch based on what you have liked/watched before.

Objective-C, NodeJS, Illustrator

Software Engineer

Massdrop
Summer '13

As an intern, I worked on the design and development of the website's front-end to increase traffic, user education, user retention, and company revenue through a better user experience and more intuitive user interface.

HTML/CSS, PHP

Co-Founder

Cyaal
Summer '12 - Present

As a co-founder of this print and web design company, I worked with my partner on various contracts for clients, including startups, student organizations, and individual people.

HTML/CSS, JavaScript, Photoshop, Illustrator, Photography

Director

1000 Pitches
Spring '12 - Spring '13

As one of the directors of the world's largest student-run idea pitch competition, I coordinated the logistics of the competition, planned and executed the marketing strategy, redesigned the UX and UI interface for the website, and led a team of 20+ students to 4500+ pitches (an all time record).

Awards/Honors:

1st Place

Imo.im Hackathon
January '13

Worked on Group Beats - an online jukebox for parties. It's a web application that allows people to add and vote songs in a playlist just by typing it in. Based on the votes, the playlist picks the songs accordingly for the best party experience.

1st Place

Startup Weekend Ann Arbor
January '12

Worked on Rapt.fm - an online rap battle website. Users log on and can freestyle against anyone in the world. Since then, the project received seed funding and was featured in *Forbes*, *TechCrunch*, *BBC*, *Venture Beat*, and many other news outlets.

Education:

University of Michigan

B.S. in Computer Science
Fall '11 - Spring '15

Besides standard CS courses, I am enrolled in the Program in Entrepreneurship and involved with MPowered Entrepreneurship and Michigan Hackers.

GPA: 3.574
